Everything you stream, all on one screen.

Why choose Google TV?

- 

No more jumping between apps

Streaming, live TV, music, and more. Organised for you.
- 

Curated recommendations

Find your next favorite movie or TV show.
- 

Just ask Google Assistant

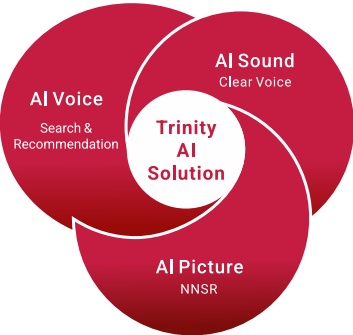

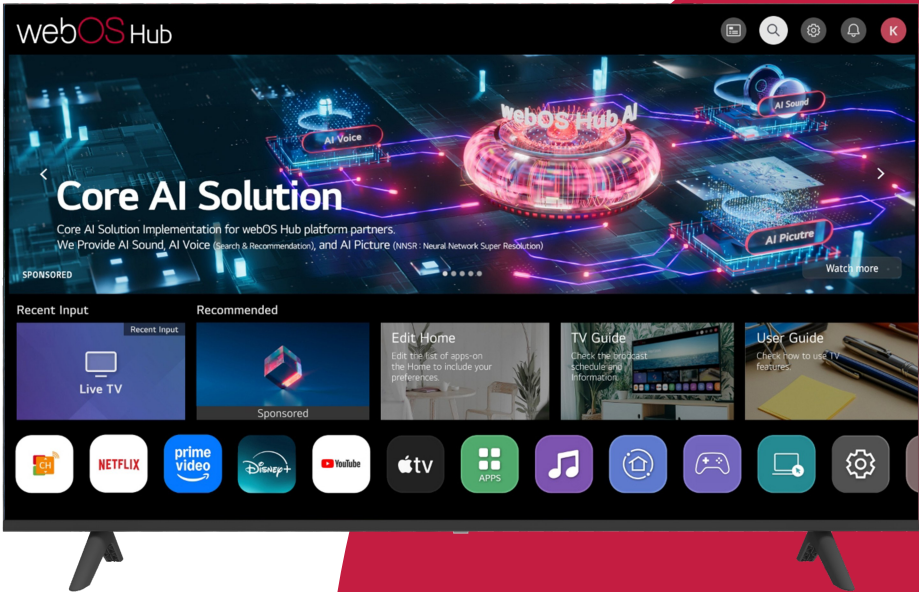

Search across apps with your voice to find what you're looking for.
- 

Build your watchlist

Add movies and shows right from your TV, phone, or Google Search.

Boost business value and cut costs with webOS's unique solution.

The heart of home entertainment

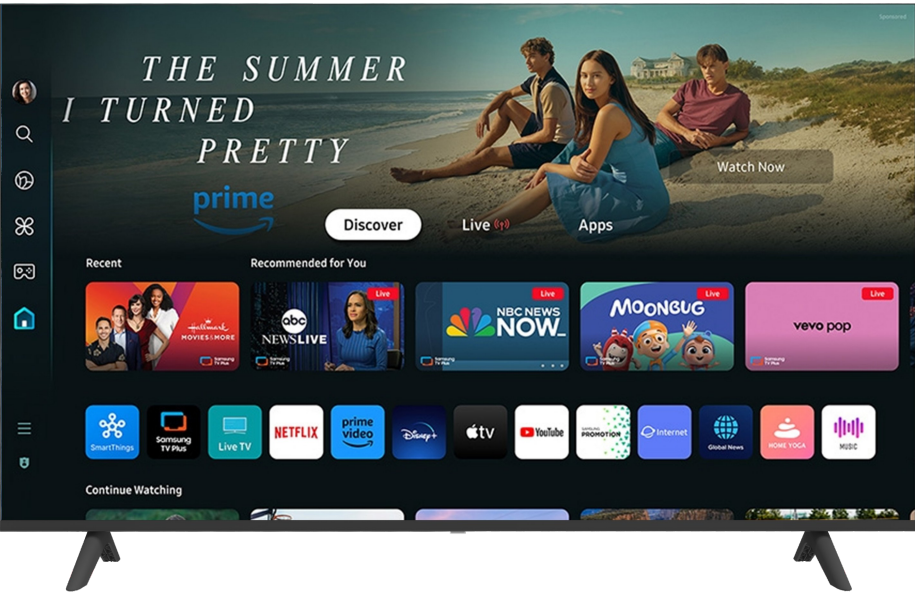

Access Netflix, Amazon Prime Video, Disney+, Max, Paramount+ Spotify, Rakuten TV, and YouTube to choose from the latest movies, TV shows documentaries, and live sports all in one place.

One place to experience over 4,000 apps, 400+ free live channels, 5,000 iconic and popular games. Welcome to webOS.

Tizen TV

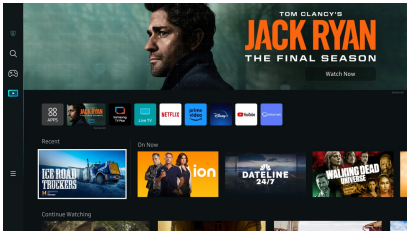

Enjoy the services and benefits of Tizen OS developed by Samsung

Why Tizen?

- ✓ Market leading OS
- ✓ Best and Premium TV Experience
- ✓ Global Presence and App Availability
- ✓ Awarded best OS

Hi, We are
Tizen OS!

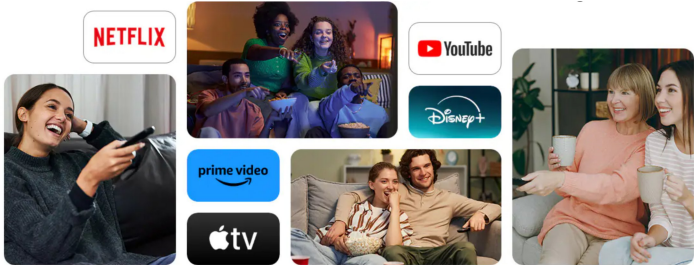

Best and Premium TV Experience

Instant access to the most popular streaming services. Discover endless entertainment, lifestyle experiences and smarter ways to connect your home. All powered by Tizen OS and built into your Smart TV. Just switch on.

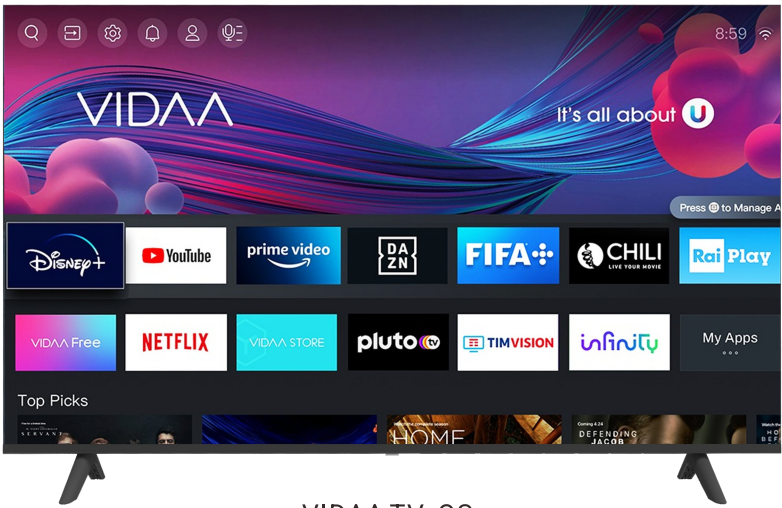

Discover all your favorite content in one place

Smart TVs come with the most popular streaming apps like Netflix and YouTube. Just switch on your new TV, and dive right into your favorite content.

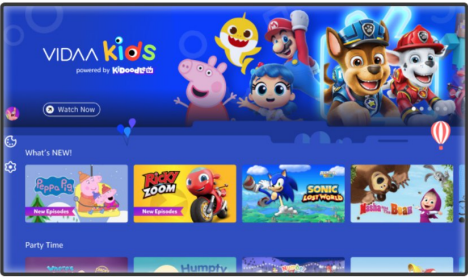

VIDAA TV

The Smart OS for Smart TVs

VIDAA TV OS

VIDAA Kids

powered by VIDAA

Easy

Experience effortless navigation with an intuitive UI, instant content discovery via universal search, optimal viewing through personalized recommendations, and quick TV setup with the VIDAA mobile app.

Fast

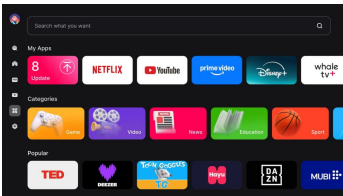

Experience instant entertainment with lightning-fast power-on and seamless high-speed performance.

Secure

VIDAA is TÜV Rheinland certified and compliant with GDPR and CCPA, while VIDAA Kids (compliant with Children's Online Privacy Protection Act (COPPA)), powered by Kidoodle.TV, provides a secure, family-friendly environment.

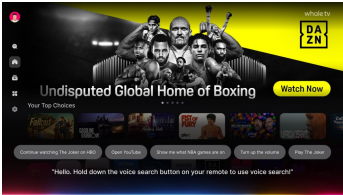

whale tv

Smart and incredibly simple to use, this TV was engineered to entertain and amaze you!

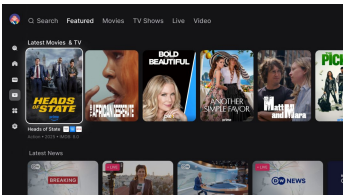

The entertainment you love

Easily download hundreds of free and paid streaming apps from the app store, including Netflix, Prime Video, Youtube and many more.

Choose your voice assistant

Whale TV gives you the flexibility to choose your own voice assistant! Opt for Whale TV's built-in , AI-powered voice assistant, or switch to Alexa. Use your voice to effortlessly find new things to watch or control your TV - "look, Mom, no hands!"

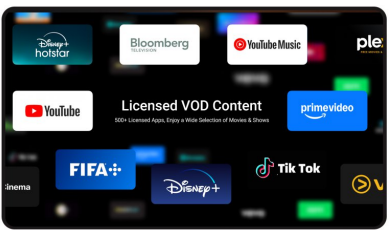

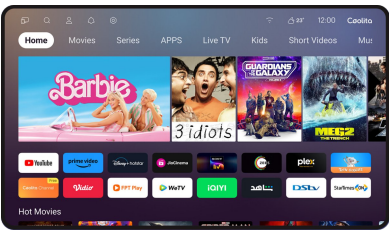

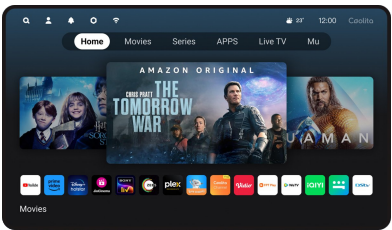

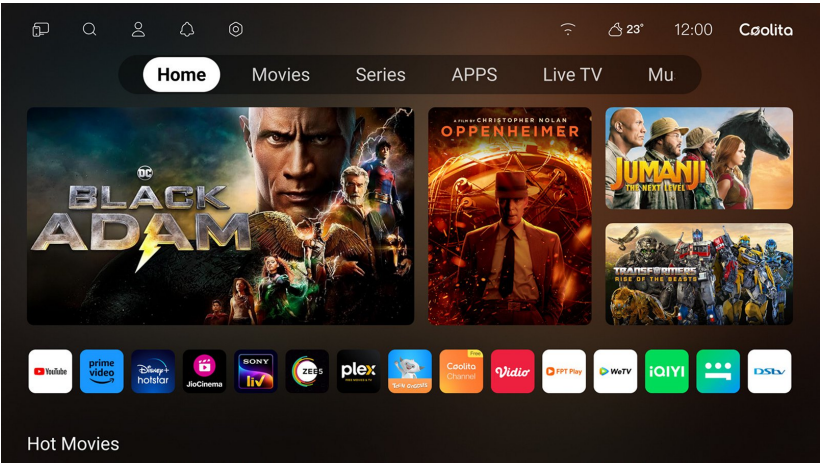

Smart & Simple

We use incredibly complex technologies - like artificial intelligence - to make discovering and finding great entertainment simple and intuitive. But don't worry, all that complexity works quietly out of sight. We also continuously update and upgrade your TV - watching experience with regular software updates. The result? Seamless and enjoyable viewing every time you sit down.

Coolita TV

Global AI Lite Smart TV OS
Faster Smart Experience

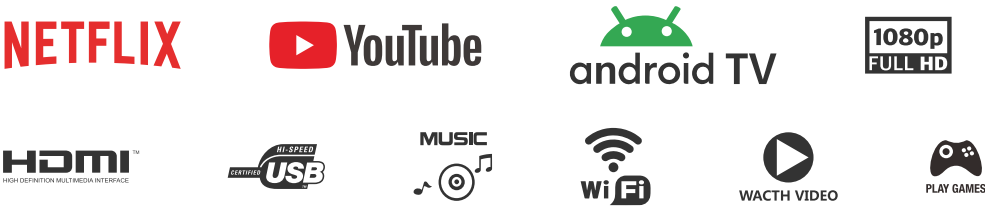

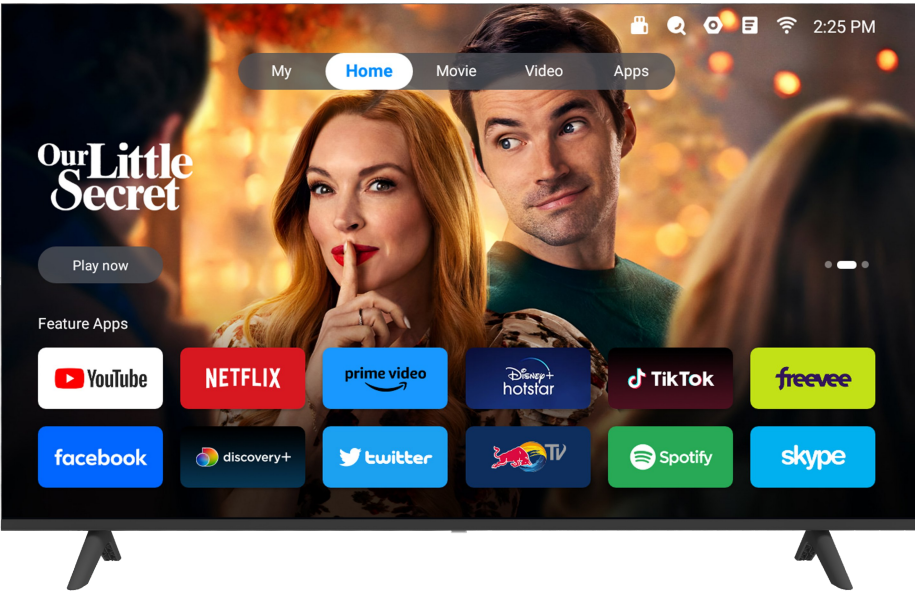

Coolita OS is a lite Web OS built on Linux kernel. Coming with low memory usage, fast performance, a simple and seamless interfaces, Coolita OS creates a lighter, smoother, and more convenient smart TV experience for you.

In line with "Cool & Clear" design concept, this new OS has been designed with simplicity and smoothness, bringing a trendy and elegant smart TV experience.

-  Creates bookmarks conveniently
-  Provides a list of frequently visited webpages
-  Supports wired and wireless high-speed network
-  Keeps browsing history
-  Supports online video playing
-  Supports USB mouse usage

AOSP TV | Android Open Source Project

AOSP is an open-source operating system, which is why it's often the go-to choice for large companies who want to update their TV equipment. You lead with your own service and a chosen line-up — including Netflix and other premium apps where you hold the operator agreement. Faster, cheaper, fully yours.

Why Choose AOSP Android TV?

- 1. No requirement to meet Google’s licensing requirements;
- 2. Control over every single element of the user experience;
- 3. The possibility to keep a ‘walled garden’ environment, that disallows the installation of additional apps;
- 4. Regular updates of the core codebase by Google.
